## Graffiti Removers Job

The career that would be best for me, is Graffiti Remover. The job suits me because, I know the importance of a clean city. I understand that graffiti is against the law, and nobody wants to see it. Graffiti ruins clean buildings, that someone else owns. Graffiti is never a good thing that needs to be stopped

When a person owns something ,it should not be graffitied by someone else. Graffiti can be dangerous because, it can distract drivers and if signs are covered they cannot be read. Also ,people should not need to see graffiti. People also graffiti abandoned property. Even abandoned property should be kept clean.

This job is important, because, people want the city clean. Nobody wants to see words,drawings, or stickers everywhere. To report any type of graffiti, call the graffiti hotline. Some people don't know the hotline is free,so they won't call. Everyone who calls the hotline helps.

In jobs the four C's are important. I thought of of two C's that might be important for the job. One C is communicate, so they can tell each other where to go and how much graffiti they need to remove. The other C is creative., so they can come up with ways to get the graffiti off. These are the two C's they need to know.

The job helps clean the city, after people have graffitied it. Without graffiti removers who would clean the city? If you see graffiti,call the graffiti hotline. The number is (800) 675-4357. You don't need to see graffiti anymore.

PUBLIC WORKS  
CITY OF DAYTON  
ESSEX /  
STREET  
SWEEPER

2ND  
PLACE

Aaron Hanson

A job at the public works day was the street sweeper that ran on natural compressed air. In the cab of the sweeper there is a computer that tells the fuel, the oil, the air in the tire, and the fullness of the tank. You can get \$300,000 a year. The driver has to take care of his or her own maintenance.

The street sweeper gets 3 loads a day. The front broom is called a gutter broom and the back broom is the main broom. There is a window from the cab to the hopper to see if it is full. For this job you have to be a self director so that you can be good at controlling yourself.

To drive a street sweeper you have to be an effective communicator so that you can tell your boss where something big is.

Aaron  
Hanson

The middle brush on the sweeper is to  
push rocks out of the way.  
To have this you have to  
be a critical thinker so you can  
figure out how to pick up glass.  
While driving the street sweeper  
you can pick a kind of  
things.

As you can see I found  
the street sweeper the most interesting.

Madison Young

### Public Works Career Day

**"Communities depend on public works, and the men and women of the profession are always there and always ready". When you think of the careers and people who keep our community safe you always think about the police and fire department but there are a lot of public workers that we don't think about. Vmus, Vactor Truck, CCTV Van, Street Sweeper, Fleet, Crackceal/Concrete, Graffiti, Recycling, Water, and Traffic Signals are all part of Public Works that help keep Victorville safe.**

**Out of all the careers I could chose from I am most interested in Traffic Signals because it is an engineering job. They are in charge of all of the traffic lights and PEDS signals at each intersection. They use a lot of electronic equipment to help monitor and control each signal. They use equipment like the Control which they also call the brain. One of the main things it controls is the timing of each signal and changes the light from green to yellow to red. It also controls how long someone has to cross the street. Besides controlling traffic it helps emergency vehicles get to the emergencies quicker. They use a device that signals emergency vehicles and gives them a green light and stops everyone elae.**

**Even though a lot of people might not think this career is important it is and it helps makes our quality of life better. It keeps us safe from accidents by telling us when to stop and go so we don't crash into each other. It gives enough time to people walking across the street so they can get across safely and not get hit by a car. It controls traffic with timing each light and gives more time when there is more traffic so the roads don't get backed up and become blocked.**

**Being a self director, effective communicator, complex thinker, quality producer, effective and ethical user of technology, and community contributor are all 21st century skills needed for this career. You have to be able to communicate with your co-workers and explain any problems so it can get fixed. You must be a complex thinker if there is a problem so you can find it, solve it and get it fixed as quickly as possible. You have to be a quality producer to make sure your job is being done right. Most importantly with this career you have to be community contributor by keeping the traffic going and the community safe.**
