

TOUCHTONE PERMITS GUIDE

Touchtone Permits Hotline (760) 955-5103

Before Calling You Will Need:

- 1) A touchtone telephone.
- 2) A site-specific permit number.
- 3) An inspection code (refer to the **Inspection Codes** list).

Schedule an Inspection:

- 1) Press '1' to schedule an inspection.*
- 2) Enter the permit type (MIS).
- 3) Enter the permit number.
- 4) Enter the appropriate inspection code.
- 5) Enter the requested inspection date.
- 6) Enter the time preference for either AM or PM.
- 7) Choose whether or not to leave a voice message for the inspector.

Once you have scheduled the inspection, you will be able to:

- Request another inspection, same permit.
- Request another inspection, different permit.
- Receive a confirmation number and hang up.
- Return to the main menu.

Cancel an Inspection:

- 1) Enter the permit type (MIS).
- 2) Enter the permit number.
- 3) Enter the inspection code.
- 4) Choose to cancel or reschedule the inspection.*
- 5) If you choose to reschedule, chose date and AM or PM.

Inspection Codes:

201 Setback/Footing/Reinforcement
203 Bond Beam
205 Pre Re-Roof
207 Special
299 Final

*The deadline for scheduling, rescheduling, or canceling Inspections is 12:00AM.

Miscellaneous Permits

Application & Inspection Guidelines

This handout is for reference only.
For more details, please see specific code sections.

RE-ROOF

Application Requirements:

- 1) Provide address for job site.
- 2) Provide number of squares being re-roofed.
- 3) Provide type of roofing material being used.
- 4) Provide valuation of project.

Inspection Requirements:

- 1) Pre Re-Roof Inspection
Inspector will review the existing roof. All plywood should be nailed down (for further information, please see **Types of Roofing**).
- 2) Final Inspection
Inspector will look at completeness of roof.

A ladder must be provided for all inspections.

Fees:

Please refer to the **Miscellaneous Permits Fee Schedule**.

Types of Roofing:

Built-Up

- 1) For the pre re-roof inspection, remove all existing roofing and have sheathing inspected.
- 2) Any roof with ponding shall be pitched to drain, before re-roofing.
- 3) Re-roof per Appendix Chapter 15, 1998 CBC (1997 UBC).

Asphalt Shingles

- 1) Asphalt shingles may be applied on slopes of two feet per 12 feet or greater. Solid sheathing is required. Double felt laid shingle fashion is required for slopes less than four and 12.
- 2) Asphalt shingles may not be installed over wood shakes or spaced sheathing.
- 3) Not more than two overlays of asphalt shingles are allowed over the existing asphalt.
- 4) No roofs shall be installed over more than two existing roofs.

Exception: Manufacturers installation requirements apply and existing roof framing must be designed to carry total load. Need structural analysis by California Certified Structural or Civil Engineer and approval of the Building Official.

Manufactured Roofing Materials

- 1) Metal, concrete, clay and other manufactured roofing products shall be listed by ICBO.
- 2) Permittee to provide City with an ICBO listed number.
- 3) All tile roofs weighing 71 lbs. or greater per square shall be engineered by a California Certified Structural or Civil Engineer with details of installation. Engineer must wet stamp and wet sign calculations/details.

*The re-roofing installation must comply with Chapter 15 of the 2001 California Building Code.

WALLS AND FENCES

Retaining and Block Walls

Application Requirements:

- 1) Provide address for job site.
- 2) Provide plot plan indicating setbacks, property lines, location and square footage of wall.
- 3) If any portion of the wall crosses over the property line, submit a letter of authorization from all other property owners involved.

Inspection Requirements:

- 1) Setback/Footing/Reinforcement Inspection
Inspector will verify rebar, footing size and location.
- 2) Bond Beam Inspection
Inspector will verify the bond beam has been placed correctly.
- 3) Final Inspection
Inspector will verify that all appropriate cells have been grouted. Do not cap the wall until the final inspection has been approved.

Access must be provided for all inspections.

Fees:

Please refer to the **Miscellaneous Permits Fee Schedule**.

All block and retaining walls must be built according to City standards. If you choose to vary from these standards, it will be necessary to submit plans designed by a licensed engineer from the State of California. This includes any walls greater than six feet in height.

Wood and Chainlink Fences

Application Requirements:

- 1) Provide address for job site.
- 2) Provide plot plan indicating setbacks, property lines, location and square footage of wall.
- 3) If any portion of the fence crosses over the property line, submit a letter of authorization from all other property owners involved.

Inspection Requirements:

- 1) Final Inspection
Inspector will inspect the completed fence.

Access must be provided for all inspections.

Fees:

Please refer to the **Miscellaneous Permits Fee Schedule**.

GAS LINE AIR TEST & ELECTRIC METER RESET/UPGRADE

Application Requirements:

- 1) Provide address for job site.

Inspection Requirements:

- 1) Pre-site Inspection
Inspector will evaluate the property to determine if there are any code violations.
- 2) Final Inspection
Inspector will observe gas line air test or observe panel, depending on type of inspection needed.

Access must be provided for all inspections.

Once the final inspection has been approved, a utility release will be sent to either Southwest Gas or Southern California Edison, whichever applies.

Fees:

Please refer to the **Miscellaneous Permits Fee Schedule**.

MISCELLANEOUS PERMITS FEE SCHEDULE

To calculate fees, select the appropriate category below and calculate the fees accordingly. Please note, there will be a \$25.50 administrative fee added to each permit.*
