

Did you know?

You can recycle steel cans (often called tin cans) and other scrap metal items in the blue curbside recycle bin?

1. Every year we save enough energy by recycling steel to supply the City of Los Angeles with electricity for ten years.

2. Every ton of scrap metal recycled saves 2500 pounds iron ore, 1,000 pounds coal and 40 pounds limestone.

3. Recycling scrap metal consumes 75 percent less energy than raw materials.
