available to the first 100 dogs**

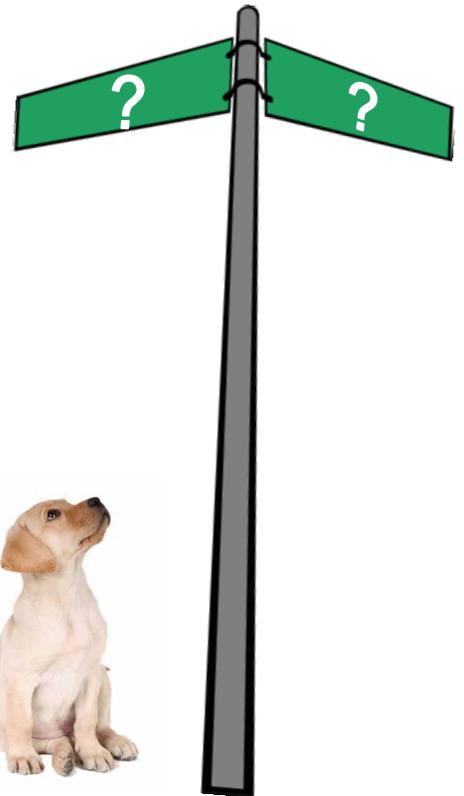

*Dog must be currently licensed in the City of Victorville

The City of Victorville Animal Care and Control and the Victor Valley Animal Protective League present a series of Microchip Clinics for dogs licensed in the City of Victorville.

Microchips are about the size of a grain of rice and are inserted under the skin with a simple shot and unlike tags and collars cannot be lost or removed. Microchips can quickly help identify your pet is lost and ends up at a shelter, and the information can easily be updated.

- This is a Cash Only event.
- Dogs must be crated or leashed under the control of an adult.
- Clinic is for dogs currently licensed in the City of Victorville.
- Microchips are \$10 after the first 100 dogs.
- Coupons for \$5 Rabies Shots at VVAPL will also be available.
